[2017 New Pass 70-339 Exam By Training Lead2pass New VCE And PDF Dumps (1-15)

2017 May Microsoft Official New Released 70-339 Dumps in Lead2pass.com! 100% Free Download! 100% Pass Guaranteed!
Thank you so much Lead2pass. You helped me passing my 70-339 exam easily, 90% of the exam questions from the dump appeared in my exam. Following questions and answers are all new published by Microsoft Official Exam Center: http://www.lead2pass.com/70-339.html QUESTION 1You are a SharePoint administrator for Contoso, Ltd. The company acquires WingTip Toys. You must be able to manage and administer SharePoint site collections in the WingTip Toys SharePoint farm by using Windows PowerShell.You need to configure permissions for SharePoint site collection administrators. What should you do? A. Add the WingTip Toys SharePoint administrators to the Site Collection Administrators group.B. Add the Contoso, Ltd. SharePoint administrators to the Site Collection Administrators group.C. Add the Contoso, Ltd. SharePoint administrators to the SharePoint_Sheii_Access role.D. Add the WingTip Toys SharePoint administrators to the SharePoint_Sheii_Access role.Answer: C QUESTION 2You are a SharePoint administrator for a company. You deploy OneDrive for Business on-premises. Files are explicitly shared with external users by sending email invitations Users report that they cannot immediately view files in the OneDrive for Business Shared with Me view. You need to ensure that users can view all files as they are shared while minimizing the changes to the current service topology.What should you do? A. Enable the Recently Shared Items cache on the My Site server.B. Enable Continuous Crawl.C. Enable the Distributed Cache on all servers.D. Enable the Recently Shared Items cache on the Search server. Answer: A QUESTION 3Hotspot QuestionsYou are a SharePoint administrator for Contoso, Ltd. You manage an on-premises SharePoint environment. A user named User1 is the site collection administrator for the Human Resources (HR) site. User1 leaves the company and is replaced with a user named User2. Access requests for the HR SharePoint site are still being sent to User1. You need to ensure that User2 receives all access requests to the HR site. How should you complete the Windows PowerShell commands? To answer, select the appropriate Windows PowerShell segment from each list in the answer area. Answer: QUESTION 4Hotspot QuestionsA company uses SharePoint2016 in a hybrid environment. You replace an administrator that has left the company.A vendor notifies you that the SSL certificate that you purchased from the vendor is expired. The hybrid environment is not able to authenticate domain users that attempt to access it. When accessing the online environment by using a cloud user account, you observe that Search is not returning results from the entire farm.You need to locate the expired certificates and renew them. What should you do? To answer, select the appropriate certificate type of location from each list in the answer area. Note: Each correct selection is worth one point. Answer: QUESTION 5You are a SharePoint administrator for Contoso, Ltd. You manage a large SharePoint Server farm. You configure a single SharePoint Search application for the farm. The Search Service application has five crawl databases. All crawl databases have content.Contoso would like to crawl content from a partner company named WingTip Toys.This crawled content must be stored in a dedicated crawl database. You need to configure the environment.What should you do? A. Provision a new Search Server for the existing Search Service application. Add dedicated crawl components for WingTip Toys to the new Search Server.B. Create a dedicated Microsoft SQL Server instance for the WingTip crawl database.C. Add a crawl database to the existing Search Service application.D. Provision a new Search Service application. Configure the Search Service application to crawl WingTip Toys content. Answer: CExplanation:Maximum crawl databases per Search Service application increased from 5 to 15 in SharePoint 2016. https://technet.microsoft.com/en-gb/library/cc262787(v=office.16).aspx QUESTION 6In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.Once you answer a question in this section you will NOT be able to return to it. As a result these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution.You must store all personal sites in Office 365.You create App Management service, Managed Metadata service, and User Profile service applications. You create a web application and site collection for the My Site Host. You grant users the Create Personal Site and Follow People and Edit Profile permissions. Then, you create an audience for the users that will be redirected to Office 365. In the SharePoint Central Administration, you configure hybrid OneDrive for Business settings.Does this solution meet the goal? A. YesB. No Answer: A QUESTION 7In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem.It is also possible that none of the solutions solve the problem.Once you answer a question in this section you will

NOT be able to return to it. As a result, these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution.You must store all personal sites in Office 365.You create and configure a User Profile service application and deploy an App Management service application. You deploy a My Site host collection. In SharePoint Central Administration, you create an audience. On the Configure hybrid OneDrive for Business settings page, you enter a value for the My Site U RL field and specify the audience.Does this solution meet the goal? A. YesB. No Answer: B QUESTION 8In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. You have an existing SharePoint 2016 on-premises environment. You are configuring a SharePoint hybrid solution.You must store all personal sites in Office 365.You configure the Managed Metadata service and User Profile service applications. You create a My Site Host site collection. In SharePoint Central Administration, you grant the Create Personal Site and Follow People and Edit Profile permissions to users and configure hybrid OneDrive for Business settings Does the solution meet the goal? A. YesB. No Answer: B QUESTION 9In this section, you will see one or more sets of questions with the same scenario and problem. Each question presents a unique solution to the problem, and you must determine whether the solution meets the stated goals. Any of the solutions might solve the problem. It is also possible that none of the solutions solve the problem.Once you answer a question in this section you will NOT be able to return to it. As a result, these questions will not appear in the review screen.Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.You are the SharePoint administrator for a company.You must provide an on-premises SharePoint solution that helps monitor and analyze your business in order to make informed business decisions that align with the objectives and strategies for the company.The solution must include the following features: - Dashboards- Scorecards- Key Performance Indicators (KPI) You configure Delve.Does the solution meet the goal? A. YesB. No Answer: B QUESTION 10Drag and Drop QuestionsYou are the system administrator for a company. You have both Microsoft Exchange 2016 and SharePoint 2016 in your environment.You plan to integrate SharePoint and Exchange and use site mail boxes. You need to configure the environment to support site mail boxes.Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. Answer: Case Study 1 - Contoso, Ltd (QUESTION 11 - QUESTION 14)BackgroundContoso, Ltd. is a manufacturing company that serves the oil and gas industry. The company produces materials and chemicals that are used in the production of gasoline. Contoso has recently acquired several smaller companies including A.Datum, Litware, Inc., and Northwind Traders. Contoso has now grown from a local company to a company that has offices in multiple geographies.The company has the following offices: Corporate structureContoso is divided into business units based on their function primarily, and then by geographic region. The corporate language is English. Contoso has a major datacenter that is located near their Dallas facilities. A. Datum Corporation has a contract with a third-party datacenter in London, England. Contoso intends to move their environment fully to the cloud in the future, and will use SQL Databases in the cloud for business continuity.Contoso has, up until recently, handled all collaboration between employees using a single file share, email, USB flash drives, and local storage. With a growing need for global cooperation and collaboration, Contoso has elected to implement a SharePoint environment. You must minimize the cost for the solution. SharePoint environment- Each business functional group requires a unique site collection. You must create child site collections for each geographical region that is part of the business functional group. - The SharePoint taxonomy must follow the corporate structure. - All existing corporate content must be migrated to the new SharePoint 2016 environment. - The SharePoint environment must be accessible to all employees 24 hours a day, 7 days a week, and 365 days a year. Data- You must retain all records for compliance reasons.- You must share sales data by using Microsoft Excel. The sales data must be available online. - The Beijing office must be able to share information to external partners.Employee requirements- Employees must only use SharePoint Designer to edit SharePoint pages. - Employees must be able to edit Excel workbooks in a browser.- Employees must have access to PowerPivot. Editing of SharePoint pagesContoso has decided that they will allow employees to edit SharePoint 2016 pages only by using SharePoint Designer. Employees must edit pages in a development environment that is located in Dallas. Changes must be applied to the production environment by using a backup/restore operation on the individual site collection. The development environment is an exact replica of the production environment. Technical requirementsSharePoint requirementsYou identify the following requirements for the SharePoint

environment:Backup and disaster recovery- The environment must be backed up at all times. You must not permit the loss of more than one hour of data.- In the event of a disaster, the SharePoint environment must remain accessible to all employees. All disaster response and recovery plans and protocols will be available from the corporate SharePoint instance. The maximum acceptable downtime for the environment is four hours. - In the case of failure, you must be able to restore the environment to any point within three weeks before the failure. SharePoint farm- You must ensure that specific offices can share content with external partners. - You must log activities related to Power Pivot in the SharePoint usage logs. - You must implement Search services from the on-premises farm. Deployment guidelinesYou have the following guidelines and protocols for implementing the SharePoint environment:- You must install and configure all servers in an identical way. - You must provision all site collections by using the SP Site. Copy method at the content database level. You must use reproducible and traceable methods to provisions sites. - You must track information about SharePoint installations in Active Directory Domain Services. - You must specify different service accounts for each service application. - Users in the Dallas test environment must be able to create content databases on demand. Planned environmentsYou plan to implement the following environments: Groups and accountsYou must create the following groups: You must create the following service accounts: Monitoring and managementYou must implement monitoring for the following aspects of the SharePoint solution:SecurityYou must be notified if administrator accounts are used to run application pools or if the server farm account is used for other services.PerformanceYou must monitor database index fragmentation and whether the paging file size is sufficient.AvailabilityYou must monitor free space on drives and receive an alert if a drive is running out of space. You must also be notified if one or more servers are not responding.SharePoint page performanceYou must monitor the manufacturing, trading, and finance instances in Beijing for the any performance issues. You must also log attempts to connect to the instances from locations outside of the corporate network.Connectivity between Office 365 and the on-premises SharePoint 2016 environmentYou must monitor connectivity between the two environments. Contoso is concerned that unauthorized users may gain access to sensitive information. You must log any attempts to access sensitive information. The company is especially interested in the logging the following actions:- attempts to open documents that contain personal information - editing sensitive documents- printing sensitive documents QUESTION 11You need to monitor the resources for the Beijing office.Which three components should you implement?Each correct answer presents part of the solution. A. searchB. proxy settingsC. Distributed CacheD. SAML authenticationE. claims authentication Answer: BDE QUESTION 12Drag and Drop QuestionsYou need to ensure that users can share sales data.For each authentication method, which option should you use? To answer, drag the appropriate option to the correct authentication method. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.Note: Each correct selection is worth one point. Answer: QUESTION 13Hotspot QuestionsYou need to create the managed paths for all site collections. For each site collection, which inclusion type should you use? To answer, select the appropriate inclusion type from each list in the answer area. Answer: QUESTION 14You need to select the backup solution for Contoso. Which solution should you use? A. premium tier Azure backupB. Basic tier Azure backupC. an on-premises backup solutionD. Standard tier Azure backup Answer: C Case Study 2 - Blue Yonder Airlines (QUESTION 15 - QUESTION 24)BackgroundGeneralBlue Yonder Airlines manufactures, sells, and services small commercial jet aircraft. The company has offices worldwide. Blue Yonder currently uses both SharePoint2013 and SharePoint 2016.The company has a public website that is based on an ASP.NET web application. Service environment (SharePoint 2013)- The legacy SharePoint 2013 farm runs SharePoint Server 2013. - This farm has over 200 site collections that are hosted on 20 content databases. There is no clear documentation that details which site collections are located in which content databases. - The SQL Server for the SharePoint 2013 is ServerRole2013. RequirementsFile metadataEvery file stored within the system must contain the following common document properties:- Document Status- Department- Author- Enterprise Keywords Values for the Document Status property must be displayed in English, Spanish, or French. The display language must be based on a user's language preferences. Additional fields or settings may be added in the future. You must be able to manage file metadata settings from a single location. When you make changes to settings, the changes must be applied to site collections and existing documents. This location must not be a part of the existing marketing, HR, or procurement team sites. Site collectionsEach departmental site must have a separate site collection. All departmental sites must be hosted in a single web application which is located at http://sp.bluevonder.com. Locations for the storage of personal documents for each employee should be created in a dedicated web application. GovernanceNo custom development is permitted. Custom solutions must not be installed on the farm. Only configurations based on standard functionality are acceptable. Employees in the marketing, HR, and procurement departments are only permitted to have Read, Contribute, or Edit permissions to their sites. Human resourcesThe human resources (HR) department is responsible for sharing information with all employees related to four themes: my work, my benefits, and my career.The naming of these themes may change overtime, and additional themes maybe added. It must be possible for someone from the HR team to edit the themes. The HR site on the intranet is divided into a top

level site with three subsites. Each subsite represents a unique team.The global navigation of the HR site must feature a listing of the relevant themes and link to custom pages that list content for each theme. The site must not display links to subsites or other pages on the HR site. Team site URLThe HR site must use the URL http://hrblueonder.com MarketingThe marketing department will use SharePoint to publish brochures, marketing materials, and announcements. Only final versions of these documents maybe added to the marketing team site for sharing with other Blue Yonder employees. Once a file is published, employees must be able to access the file by using a consistent link even if the file is renamed or moved within the site. User file storageFiles that are in draft mode must not be accessible to any user except the author until the file is ready for review. Each marketing employee must have a single location for storing draft work, work in progress materials, and other personal files. Files stored in this location must only be accessible to the employee that owns the area unless the employee chooses to share a file with other users. The storage location must be created automatically for an employee and must not require assistance from IT for configuration.The URL for each employees' site must be http://emplovees.bluevonder.com/mv/personal/username.where username represents the login of the employee. Public websiteThe public website is not part of the SharePoint environment. It is a standalone ASP.NET website. Content on the public website, including news and job postings, is updated once a month. Information posted to the public website must by accessible by using search. Information stored in the Downloads section of the website must not be crawled due to the large size and the number of files. Team site URLThe team site for The department must use the URL, http://marketina.bluevonder.com. ProcurementThe procurement department uses SharePoint to store contracts and related documents. You must store these documents in a few document libraries as possible. The documents may contain precedents or terms that are relevant for reuse. The procurement site stores over 20 million documents. The term store for the site contains two million terms. File storageCurrently, the site consumes approximately100 gigabytes (GB) of storage. This is expected to double within a year. It is expected that search will be a key feature for this group. SearchWhen a search is conducted and a user hovers over the search result, the user must be able to easily launch the document, visit the library that is stored in, or preview the file. The links to the document and the library must appear above the preview of the file. Team site URLThe site for the department must use the URL http://procurement.bluevonder.com ProductsThe product team uses the legacy SharePoint 2013 farm. You must upgrade the farm to SharePoint Server 2016 so that the product team can take advantage of all the services that are available to the other departments.The existing products site is very active. You must ensure that users cannot change the site content during the upgrade process. SharePoint2016Logical architecture- The SharePoint environment has two web applications. One web application is used for Departmental Collaboration, and the other is used for Central Administration. - Each departmental site should be configured as a separate site collection. - All departmental sites should be hosted within the same web application. The web application is accessible at the URL http://sp.bluevonder com- Locations for the storage of personal documents for each employee should be created in a dedicated web application. Server environment- The server farm is configured with SharePoint Server 2016 and Office Online Server. No additional addons or software packages are installed.- The SQL Server for the SharePoint 2016 farm is ServerRole2016. - The farm should leverage Min Role with a dedicated server for search. QUESTION 15You need to configure search for the marketing public website. What should you create? A. a Content typeB. a SharePoint Site content sourceC. a Web Sites content sourceD. an Enterprise Search Center Answer: B Suggestion, read 70-339 questions carefully try to understand or guess what they're asking for. Hope everyone passes. 70-339 new questions on Google Drive: https://drive.google.com/open?id=0B3Syig5i8gpDLU14ZUEtYkdPeUk 2017 Microsoft 70-339 exam dumps (All 98 Q&As) from Lead2pass: http://www.lead2pass.com/70-339.html [100% Exam Pass Guaranteed]
