### QUESTION 12

Your company has a hybrid deployment of Office 365. You need to set the authentication method of the federation servers to forms-based authentication. What should you do?

- A. Modify the Web.config file in the %systemroot%\inetpub\adfs\ directory.
- B. Modify the Global.asax file in the %systemroot%\inetpub\adfs\ directory.
- C. From the AD FS 2.0 Management console, add a relaying party trust.
- D. From the AD FS 2.0 Management console, add a claims provider trust.

Answer: A

### QUESTION 13

A company named Tailspin Toys has an Office 365 subscription. The company identifies the administrative requirements shown in the following table.

User name	Administrative requirements
User1	Assign Office 365 licenses to users.
User2	Delegate administrative roles to users.
User3	Monitor Office 365 Service Health.

You need to identify which roles must be assigned to the company's administrative users to meet the requirements. Which roles should you assign to the users? To answer, drag the appropriate user to the correct role in the answer area.

Users	Answer area
User1	User <b>Billing administrator</b>
User2	User <b>Global administrator</b>
User3	User <b>Password administrator</b>
	User <b>User management administrator</b>

Answer:

Users	Answer area
	User <b>Billing administrator</b>
	User2 <b>Global administrator</b>
	User3 <b>Password administrator</b>
	User1 <b>User management administrator</b>

#### QUESTION 14

- A. Get-MSOLUser
- B. Get-Mailbox
- C. Get-Recipient
- D. Get-RemovedMailbox
- E. Get-RoleGroupMember
- F. Get-MailContact
- G. Get-ManagementRoleAssignment
- H. Get-LogonStatistics
- I. Get-User
- J. Get-MailboxStatistics
- K. Get-MSOLContact
- L. Get- Group

Answer: G

#### QUESTION 15

This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your company uses Office 365. You need to obtain a list of all the users who have NOT accessed their mailbox during the past 90 days. Which Windows PowerShell cmdlet should you use?

- A. Get-Mailbox
- B. Get-LogonStatistics
- C. Get-Recipient
- D. Get-MSOLUser
- E. Get-Group
- F. Get-ManagementRoleAssignment
- G. Get-User
- H. Get-MailboxStatistics
- I. Get-RemovedMailbox
- J. Get-MailContact
- K. Get-MSOLContact
- L. Get-RoleGroupMember

Answer: H

#### QUESTION 16

This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your company has an Office 365 subscription. All user mailboxes are hosted on Microsoft Exchange Online. Corporate security policy states that all administrative users must be assigned the minimum number of permissions. You need to ensure that an administrator named Admin1 can create custom administrator roles for several regional help desk users. The custom roles will be used to manage Exchange Online. To which role or role group should you add Admin1?

- A. User management administrator
- B. Recipient Management
- C. Service administrator
- D. View-Only Organization Management
- E. Records Management
- F. Billing administrator
- G. UM Management
- H. Discovery Management
- I. Global administrator
- J. Help Desk
- K. Password administrator
- L. Organization Management

Answer: I

#### QUESTION 17

This question is part of a series of questions that use the same set of answer choices. Each answer choice may be used once, more than once, or not at all. Your company has an Office 365 subscription. All user mailboxes are hosted on Microsoft Exchange Online. Corporate security policy states that all administrative users must be assigned the minimum number of permissions. You need to ensure that an administrator named Admin5 can configure federation for Microsoft Lync Online. To which role or role group should you add Admin5?

- A. Global administrator
- B. Billing administrator
- C. User management administrator
- D. View-Only Organization Management
- E. Organization Management
- F. Help Desk

- G. Service administrator
- H. Password administrator
- I. Discovery Management
- J. UM Management
- K. Records Management
- L. Recipient Management

Answer: A

#### QUESTION 18

You are implementing a hybrid deployment of Office 365. You discover that users who have migrated to Office 365 cannot view the free/busy information of users who are hosted on the Microsoft Exchange Server on-premises environment. The Exchange on-premises users can view the free/busy information of all users. You need to ensure that the users who have Office 365 mailboxes can view the free/busy information of users who have Exchange on premises mailboxes. Which node should you modify from the Exchange Management Console?

- A. Microsoft Exchange On-Premises - Organization Configuration
- B. Microsoft Exchange On-Premises - Server Configuration
- C. Microsoft Exchange On-Premises - Recipient Configuration
- D. Office 365 - Organization Configuration
- E. Office 365 - Recipient Configuration

Answer: A

#### QUESTION 19

Your company uses Office 365 for all users. The company has the contoso.com SIP domain. You need to change the SIP address of a user named User1 from user1@contoso.com to user2@contoso.com. You must achieve this goal in the minimum amount of time. What should you do?

- A. Modify the PrimarySmtpAddress attribute of User1.
- B. Add a proxy address to the properties of User1.
- C. Create a service request.
- D. Modify the sign-in status of User1.

Answer: C

#### QUESTION 20

Your organization owns and operates two separate companies named Tailspin Toys and Wingtip Toys. The company has one Office 365 subscription. All users at Wingtip Toys have an email address that uses the wingtip toys.com suffix. All users at Tailspin Toys have an email address that uses the tailspin toys.com suffix. The business units have the following configurations: ?The email infrastructure of Wingtip Toys is hosted entirely on Office 365. ?The email infrastructure of Tailspin Toys is a hybrid deployment of Office 365 that uses single sign-on. The Tailspin Toys network contains three servers. The servers are configured as shown in the following table.

Server name	Server role
ExServer1	Microsoft Exchange Server 2010 Service Pack 1 (SP1)
ADFSServer1	Active Directory Federation Services (AD FS) 2.0
DirSyncServer1	Directory Synchronization

You delete an Tailspin Toys user. You need to ensure that the deleted user's name is removed from the global address list (GAL) as soon as possible. Which cmdlet should you use?

- A. Add-MSOLGroupMember
- B. Update-MSOLFederatedDomain
- C. Set-MSOLDomainFederationSettings
- D. Set-MSOLUserPassword
- E. Set-MSOLDirSyncEnabled
- F. Start-Job
- G. Add-Member
- H. Convert-MSOLDomainToStandard
- I. Start-OnlineCoexistenceSynch
- J. Set-MSOLDomainAuthentication
- K. New-MSOLLicenseOptions
- L. Set-MSOLGroup
- M. Confirm-MSOLDomain
- N. Set-MSOLUserPrincipalName
- O. Set-MSOLUser

Answer: G
